START BUYING

Body of Chalcopyrite 334 Feet Low Price of That Issue At- Shipments Made From Eagle Wide Is Proven 3,000 Feet Long.

Energetic development work carried on during the summer by Curry & De Voe, more than 25,000 shares changing hands, in their property in the Red Butte dis- indicated that a strong element has betrict, has proven the existence there, it come convinced that it is a good buy \$3,651.98. trict, has proven the existence there, it come convinced that it is a good buy \$3,651,98. The mine is developed to the is said, of a body of chalcopyrite ore 334 around present prices. The new low level 200-foot level, and, in view of the results feet wide and more than 3,000 feet long. of 62c was struck by it early in the morn-obtained, it has been decided to sink the feet wide and more than 3,000 feet long. of 62c was struck by it early in the morn-

of a San Francisco syndicate, and he is said to have been most favorably impressed with the showing.

Red Butte district, which is north of Rosebud and only a few miles from the Western Pacific railroad, was discovered by Salt Lake prospectors about the time of the financial panic. Experts recognized it as a very promising district, but, on account of the money situation, means for extensive development could not be obtained. Owners of several properties have kept at work on a small scale, howhave kept at work on a small scale, however, and results are said to forecast the opening of an important new camp. Aside from the immense veins of copper ore, several promising gold ledges have been governed.

Are Said to Be Purchasers of Woodman Copper-Gold Property.

The Guggenheims, it is now said upon Grutli apparently good authority, are the pur- I. P. & O. chasers of the Woodman property, in | Ibex Gold Deep Creek, and the purchase is believed to mean a great deal for the future advancement of the district. The price to be paid, it is said, is \$280,000, of which \$16,000 is paid down, the remainder coming in two payments. A fifty-ton gold mill is to be placed upon the property at once and a large sum is to be expended monthly for development. An engineer is due from New York in a few days to inaugurate extensive operations.

monthly for development. An engineer is due from New York in a few days to inaugurate extensive operations.

The Woodman property comprises thirteen patented claims. It was formerly owned by Colonel J. F. Woodman. Upon his death it passed to the Woodman heirs, who formed the Woodman Mining company. Included in the group are three gold properties, the Cane Springs, Alvarado and Bonnemort, which are accredited with a production of something like \$300,000, with meagre development.

The copper property is the Frankie, which is said to be one of the most remarkable copper-gold propositions in the country, having a vein 250 feet wide which extends the full length of the claim. It adjoins the Lucy L. mine on the west.

TAKES OVER RICH MINE. McCormack of Goldfield Buys Par- Provo .. rett for \$90,000.

rett for \$90,000.

The Parrett mine at Lundy, Mono county, California, which is said to have a phenominal showin gof gold ore, has been taken over by J. C. McCormack of Goldfield, for \$90,000. The purchase was made, it is understood, in the interest of the Broken Hills Mining company, of which Mr. McCormack is general manager.

Ten known veins 'raverse the property, it is said, in which is high-grade ore ready to ship, as well as large bodies of milling ore. Samples appear to be easily obtained which run as high as \$700 a ton.

The property adjoins the famous May Lundy mine. By some it is considered even a better property than its better known neighbor. It was located twentynine years ago by the man who has just sold it, many prior offers having been refused. The only equipment it has ever had is an old arrastra, which has turned out \$50,000 from the work of one man.

Mr. McCormack has already granted one to the control of the said to have a phenominal solution in the solution is soluted. Solute Col. Solute Col. South had is an old arrastra, which has court \$50,000 from the work of one man.

Mr. McCormack has already granted one lease on the property, which is in operation, and he intends to undertake at once tion, and he intends to undertake at once tion.

Upper Levels Last Five Months.

The Fairview Eagle Mining company, operating at Fairview, Nev., during the five months ending Sept. 30, shipped 186.27 tons of ore which brought net returns of Trading in Iron Blossom yesterday, with feet wide and more than 3,000 feet long. The depth of the encrosus body of ore has not been sounded, but its occurrence in a strong gravo-diorite formation leads to the belief that the vein will show great depth and permanency.

Behm & Wetherill, who have been developing a similar ore body in the same district, have not arrived at the stage where definite measurements may be taken, but their vein is said to be an exceedingly rich and large one.

An expert was in camp recently examing the two properties in the interest of a San Francisco syndicate, and he is said to have been most favorably impressed with the showing.

The depth of the encrous for 62c was struck by it early in the morning and from that time on it advanced its advanced steadily to 69c, closing at 68c bid.

New strength was in evidence throughout the market at the afternoon session of the exchange. Sioux Consolidated was strong at 66c to 68c, Colorado braced up to \$1.30 after having been forced down to \$1.27½, Grand Central was steady at \$2.03½ and Provo brought 7½c to 8c. Columbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear raid which sent it from 79c to 76c lumbus Consolidated was subjected to a bear

Increase of \$18,000,000 in the Value of Cheaper Stocks Is Figured.

That the cheaper copper issues of the Ely district have in the last thirty days ecorded an average advance of 300 per cent, representing a total increase of \$18,-000,000 in their valuation, is the net result of the new movement in those stocks as figured by the Ely Expositor. One of the principal causes for the new interest in the camp, it is pointed out, is the discovery of ore bodies in the lime-stone, which adds a heretofore uncredit-ed possibility to the future of the dis-trict. Great as the district is and yet promises to be through its known deposits of porphyry ore, this new discovery adds many times to its future prospects and affords new support to the contention that it is to be foremost in the ranks tion that it is to be foremost in the ranks of the world's copper producers.

Summing up the situation briefly, the last thirty days may be said to mark the beginning of a new epoch in the history of the camp, with interest from a general standpoint in the so-called smaller stocks. Some of the increases in market value have been as great as 800 per cent. That increase is shown by Ely Consolidated, which went from 8 cents a share to as high as 66 cents.

Some Marked Advances.

Others which have made marked advances are: Ely Central, which in thirty days went from \$1 to upwards of \$2 a share; Ely Witch, which advanced from 15c to 40c; Boston Ely, whose advance was from \$1.50 to close to \$3; Federal Ely, whose rise from 6 cents to 19 cents represented an increase of more than 300 per cent; McDonald Ely, which went from 15c to 50c, and Ely Western, now quoted at 17c, whose stock a month ago went begging at 7 cents.

And in this record of advances no account is taken of a number of companies, like Ely Resurrection, whose shares are like Ely Resurrection, whose shares are so closely held that no quotations reach the market. That the holdings of the majority of these have increased in proportion with the others there is no doubt. The great increase of market values became possible, of course, through the operation of circumstances which have operation of circumstances which have virtually resurrected dead properties. The opening of bodies of shipping ore in such properties as the Giroux, the Ely Central, the Ely Consolidated and Ely Resurrection has provided the new life-giving phase to the district's future. Before this it was generally believed that Ely was an exclusively low grade camp; that the only hope for the future was in the yeart deposits of porphyry ore, which can vast deposits of porphyry ore, which can be worked to advantage only by the large companies. The new disclosures give most of the smaller companies a chance to open paying mines, and the situation is given added zest by the activity of large interests in taking over new prop-

Room Yet to Soar.

And few if any of the cheaper Ely stocks have reached a point in market value which would anywhere near represent the real value of the property if the promised era of activity is to be carried cut. Ely Central, selling above \$2 a share, is believed by many to be worth more, upon its ore showing. And yet several of those whose shares are selling at from 15 cents to 60 cents are owners of properties likely to be as valuable. Federal Ely, for example, not only has large area of excellent mineral ground, with considerable development, but it owns water rights which experts appraise at as high a valuation as \$1,000,000. The new activity means that additional reduction facilities, must be provided, and they cannot well be provided without creating a demand for Federal Ely's water

COALITION OF ELYS ASSURED

Guggenheims Fix Basis of Exchange at 31-4 Shares for One.

At the annual meeting of shareholders of the Nevada Consolidated company, to be held Nov. 2, the shareholders, according to the call just issued, are to vote for ing to the call just issued, are to vote for the issuing of 400,000 shares of new stock to be offered in exchange for the 1,300,000 shares of the Cumberland Ely company, upon the basis of one share of Nevada Consolidated stock for three and one-quarter shares of Cumberland Ely. It is declared that this action is recommended to the shareholders by the unanimous vote of the board of directors.

"Many conferences were held to bring

of the board of directors.

"Many conferences were held to bring this about," says the Boston News Bureau, "and the action was accepted by large minority interests only when it was shown that the Guggenheim interests were in such control of Cumberland Ely that no other outcome was possible, and Cumberland Ely stockholders might have been worse off had the Guggenheim inbeen worse off had the Guggenheim in-terests been defeated in their plans and remained in the management with 450,000 shares of stock.

"It is claimed that Nevada Consoli-2.75 3.00

"The Payment Way Is the Only Way"

So say thousands of our pleased and satisfied customers. They're telling their friends of the wonderful advantages of our generous credit system and that our prices are actually as low and in many instances lower than those at the "cash" stores.

Women's suits, long coats and hats in the season's best styles—all marked as low as sane merchandising will allow, and offered to you at small monthly payments.

Men's suits and overcoats priced as low as qualities will allow, and sold on the same liberal terms.

Select your garment—put it on—wear it, and pay

\$1.00 a Week-\$4.00 a Month

"The Quality Store"

Engineer Says Banks Take Big Fees for "Examining" Mines.

Anxiety of western mine owners to rs of properties likely to be as valuable. the practice of a new species of "wild-Federal Ely, for example, not only has catting" by eastern financial sharks, according to a well-known Salt Lake engineer, who declares that the new is to induce the mine owner to advance a large fee for examining his property by xperts, with no intention upon the par of those receiving it to ever give anything The engineer had just received by mai

a proposal from an eastern agent to fur-nish a buyer for a well known Utah mine, upon certain conditions. The condition upon which the greatest stress was placed upon which the greatest stress was placed was that the owners of the mine should pay for examination by a well-known expert, the taking it over depending altogether upon his report.

"That reminds me," said the engineer, "of an experience I had not long ago, when I went with a mine owner to a prominent banking house in an eastern city, to aid him in presenting his applica-

orominent banking house in an eastern eity to aid him in presenting his application for financing a property. When we had been admitted to the private office of the official who had charge of that department of the bank's affairs, he said: partment of the bank's affairs, he said:

"'Ah, you want to present a mining
proposition. Then before we proceed further you had as well understand that before we take up anything of that kind
the sum of \$5,000 must be deposited in the
bank to cover the cost of an examination
by our expert, the amount to be forfeited
in the event that his report is unfavor-
